

PRESS RELEASE

Over 4.3 Million PhilIDs Delivered in Region 6

Date of Release: June 13, 2024

Reference No. 2024- PR15

Recipients receive their National ID cards for use in private and government transactions.

The Philippine Statistics Authority – Regional Statistical Services Office VI is pleased to announce the successful delivery of 4,562,074 PhilIDs in Region 6 as April 30, 2024. This significant milestone underscores the commitment of the PSA to provide efficient and accessible national identification to citizens across the nation.

The delivery of PhilIDs is part of the government's initiative to streamline identification processes and ensure that every Filipino has a valid proof of identity.

In addition to the PhilIDs, Region 6 has also issued 2,557,637 ePhilIDs, which offer the same validity and functionality as the traditional PVC card. Remarkably, the delivery and issuance of both PhilIDs and ePhilIDs represent about 103 percent of the total registered population in the region. This suggests that individuals who were initially issued ePhilIDs have already received their PVC cards, demonstrating the efficiency of the registration and issuance process.

Both PhilIDs and ePhilIDs can be used in all transactions requiring valid proof of identity. The office assures everyone that the National IDs are accepted and

recognized, with the agency closely coordinating with establishments to ensure their acceptance.

The PSA extends its gratitude to the citizens of Region 6 for their cooperation and participation in the registration process. Through their active involvement, the government can further enhance service delivery and promote transparency and accountability
