Provincial Share to Regional Palay Production

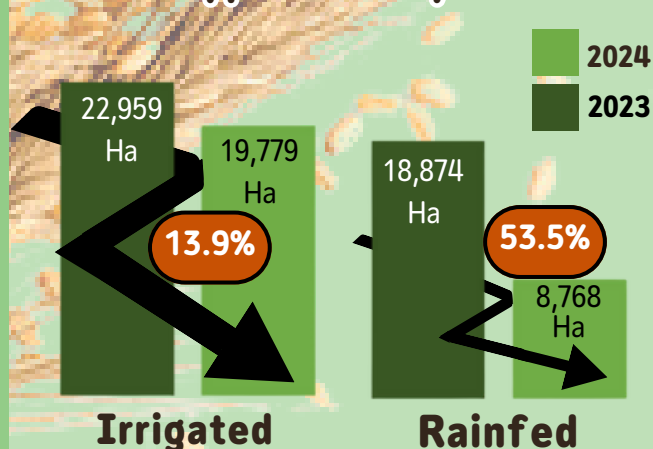

Total Palay Production by Type of Ecosystem

Provincial Share to Regional Palay Area Harvested

Total Palay Area Harvested by Type of Ecosystem

Production- refers to the quantity produced and actually harvested of crop during the reference period. Estimates were taken from the Palay Production Survey.

Area harvested- refers to the total area harvested to palay during the reference quarter. It may be less than or equal to the total area planted to palay.

Irrigated- area with irrigation facilities supplying water through artificial means like gravity, force/power, pump, etc.

Rainfed- the area holds standing water but solely dependent on rainfall for its water supply.
